

The process to gather the software requirements from Client, Analyze and Document is known as

- Requirement engineering process
- Requirement elicitation process
- User interface requirements
- Software system analyst

Given TABLE_A (Attribute1, Attribute2, Attribute3) and TABLE_B (Attribute4, Attribute5, Attribute6) shown in the figure below, which of the following would display the correct placement of foreign keys in the relational model?:

- TABLE_A (Attribute1, Attribute2, Attribute3, Attribute4, Attribute5); TABLE_B (Attribute4, Attribute5, Attribute6)
- TABLE_A (Attribute1, Attribute2, Attribute3); TABLE_B (Attribute4, Attribute5, Attribute6, Attribute1)
- TABLE_A (Attribute1, Attribute2, Attribute3, Attribute4); TABLE_B (Attribute4, Attribute5, Attribute6, Attribute1)
- TABLE_A (Attribute1, Attribute2, Attribute3); TABLE_B (Attribute4, Attribute5, Attribute6)

An IP address value of all binary one's means:

- Loopback
- This Host
- Broadcast on The Local Network
- A Host on This Network
